Digitalization in Health Sector

AI/ML BASED

Why we choose this statement:

As per the Lancet report 1.6 million Indians died due to poor quality of care in 2016. And nearly twice as many as due to non-utilisation of healthcare services(838,000 persons) that why we visualized to make the healthcare system more mobile and easy available with 27*7 capabilities.

Solution:

HEALTH PILOT

We have here modernized our healthcare system through HealthPilot Fun Bot , HealthPilot Checker , Scheduling Appointments with Doctors and Doctor Login System .The fun bot is used to tell jokes to uplift our mood through jokes , Jokes helps one to cope mental pressure and lighten our mood. Here we are predicting one's possibility to have a certain Disease. Here we are using our model's API to predict the possibility to have the particular disease based on specific chosen symptoms. Finally we are also allowing users to book online appointment for check up.
